UV Laser Marking Machine for Glass

1. General Description of Ultraviolet Laser Marking Machine System:

The ultraviolet laser marking machine adopts superior performance imported ultraviolet laser generator, since the ultra-small focusing spot of 355nm ultraviolet light and Processing heat affected zone is negligible. Ultraviolet Laser Marking is suitable for processing those materials that have a big reaction to thermal radiation. Ultraviolet Laser Marking Machine is mainly used to mark, engrave and cut for special materials and meet the requirement of marking ultra-fine. It is widely applied in ultra-fine laser process of the high-end market.

2. Features of RL-UV series Ultraviolet Laser Marking Machine:

1. High laser beam quality, tiny light spot, hyperfine marking, and the minimum character can up to 0.2mm.

2. 355nm outgoing wavelength reduces the thermal effect on the workpiece; the heat affected zone will not bring about heat effect, material no deforming or burning.

5. Certification

6. FAQ

Q1: What's the package?

A: We have 3 layers package. For the outside, we adopt wood craft case. In the middle, the machine is covered by foam, to protect the machine from shaking. For the inside layer, the machine is covered by thickening plastic bag for waterproof.

Q2: Will the package damaged during transportation?

A: Our package is considerate all the damage factors and make it to be safe, and our shipping agent have full experienced in safe transportation. We have exported to 180 countries worldwide. So please don't worry, you will receive the parcel in good condition.

Q3: How to install and run the machine?

A: Our technician have installed the machine before shipping. For some small parts installation, we will send detail training video, user's manual along with the machine. 95% customers can learn by themselves.

Q4: How can I do if the machine goes wrong?

A: If confronted with such problems, please contact us asap and do not try fix the machine by yourself or someone else. We will response within 24 hours as quick as we can to solve it for you.
